# **NO DEPORTATION! NOT IN A PANDEMIC, NOT EVER!**

-- surround parliament // in chain of 2-meter distanced people --

Germany is currently doing more deportations than before the pandemic! These last 3 months, the deportation machine is operating in overdrive. We counted 42 deportation charter-flights since November. In the middle of a currently peaking pandemic. Every deportation is an act of racism. Doing this in a pandemic makes the racism even more obvious.

We are outraged! While the government asks us all to stay home during lockdown, some of us have no choice but to resist mid-night deportation raids and to resist being forced in charter-planes. If the government thinks they can get away with this in silence, they are wrong. More than ever, we need solidarity. More than ever we need to confront this government with our demands:

No Deportation! Not now, while a pandemic is raging!  
And not ever!
